Sanford Health – EMS Education South Dakota Monthly EMS Education Program

For more details contact us at EMSServices@sanfordhealth.org or call 605-328-6389

Continued Competency Program) education requirements. This program will provide learners with the convenience and ease of maintaining EMS continuing education from the comfort of their home and/or community. This model builds upon the existing platform that has served EMS agencies in the region for over 20+ years. Learners will now utilize modern technology and video communication to achieve educational needs through LIVE video broadcasts and interactive on-line learning. **All of the classes are approved for CAPCE continuing education credit.**

As a commitment to sustain the ongoing demands for EMS continuing education, Sanford Health will be delivering LIVE monthly education to EMS agencies through video broadcast sessions multiple times each month. Each monthly broadcast will be recorded for learner playback at a later date and time if needed. Video playback provides learners the ability to fulfill educational requirements if they are unable to attend a live session from the comfort of their home or community. EMS agencies will have the ability to adjust the date of their LIVE video broadcast if needed. Broadcasts will occur each week on Monday evenings at designated times.

Each individual learner account will have access to multiple education modules that match NCCP requirements through the use of LIVE, recorded video, interactive learning modules or self-paced programs. Individual education records are now available on-line to display completed courses and course options. Learners are able to upload external courses and classes to their education log for a cumulative record demonstrating their educational accomplishments.

Enrollment into the monthly education program for the 2023 program year will be covered by a generous grant through Tripp County Ambulance and SAMSHA. Eligibility for program enrollment are those EMS providers currently affiliated with an EMS agency in the State of South Dakota. Participant expectations require commitment and participation throughout the program year to fulfill grant requirements.

Funding for this initiative was made possible by grant no. H79TI084695 from SAMSHA. The views expressed in written conference materials or publications and by speakers and moderators do not necessarily reflect the official policies of the Department of Health and Human Services; nor does mention of trade names, commercial practices, organizations imply endorsement by the U.S. Government.

**Education Plan covering the NCCP requirements
for State and National Registry of EMT's**

**A dedicated educational commitment to the needs of
EMS providers in the region**
